

JACS SOLUTIONS

CUSTOM-BUILT TOUCH SOLUTIONS FOR HEALTHCARE

Mobile healthcare technology, which combines telecommunication and information technologies, has become an essential part of daily operations in hospitals, clinical systems, home health agencies, research labs, and consumer workplaces. JACS Solutions helps you achieve your mission by bringing the best technology to your facility to optimize your care environments, offer you the right tools, help extend patient care, and keep costs down.

JACS Solutions' smart devices, charging carts, and customized solutions for healthcare providers help remotely monitor patients' health, give practitioners the tools they need, and integrate seamlessly with diagnostic medical systems and platforms. JACS Solutions' devices and displays also provide the security you need for protecting PHI, achieve HIPAA compliance, and enable you to access the resources to make informed diagnostic decisions for your patients.

JACS' ANDROID TOUCH SOLUTIONS ARE PERFECT FOR:

- *Remote Patient Monitoring*
- *Electronic Medical Records*
- *Data Collection & Transmission*
- *Healthcare Applications*
- *Patient & Visitor Check-In*
- *Prescription Inventory Management*
- *Much, much more!*

THE JACS APPROACH

FIRMWARE CUSTOMIZATION. Security comes first with a JACS touch solution and security begins with your firmware. Each JACS product is purged of bloatware and consumer-grade applications found in off-the-shelf devices for a faster and more secure. We can then add and remove the apps of your choice to and from the device, modify Android system settings, create a custom OS launcher, create a configuration-free deployment, and much more.

HARDWARE CUSTOMIZATION. Whether you're looking for a touch solution for patient health records or patient check-in, build your solution to work exactly how you need it with JACS Hardware Customization services. If you have a vision, we'll help you fulfill it with customization options for mode of connectivity (cellular, Wi-Fi®, or PoE), operating system (Android or Windows), memory, processing power, camera, ports, and more. JACS Solutions can even personalize your devices with your branding.

ANDROID 4G LTE TABLETS

Powerful 8" displays combine the security and flexibility you need in an enterprise-grade solution with the cellular connectivity you need to do more, in more places.

JACS' 4G LTE tablets are certified on either the Verizon and AT&T network, perfect for telemedicine solutions, healthcare applications, data collection, prescription inventory management, and much more.

ANDROID TOUCH DISPLAYS

JACS Android touch displays are all-in-one units combining Android OS, Wi-Fi® connectivity, and interactive touchscreens

in a cost-effective digital signage solution. Available in screen sizes from 10" to 55", these digital displays are an ideal platform for improving interactive patient experiences via services such as wayfinding, patient & visitor check-in, and digital signage.

ANDROID POE TOUCH DEVICES

Available in 10.1" and 15.6" displays. JACS' Android Power over Ethernet (PoE) devices are uniquely designed to give you a robust, flexible, and cost-effective platform. These stationary interactive displays are perfect for patient check-in, digital signage, and more. By providing PoE, customizable Android OS, touchscreen, and USB connectivity, these devices are made to help create the custom solution, perfect for your healthcare needs.

COMMERCIAL GRADE.

More durable than consumer-grade options with lower upgrade cost. All models include powerful processing capabilities and extended warranty options.

TOTAL SOLUTION.

JACS offers custom accessories such as stands, cases, charging carts and more to help you build a total solution for your business and beyond.

UNBEATABLE PRODUCT LIFE CYCLES.

With more than double the life cycle of consumer-grade tablets, get the best value for your business and customers.

ABOUT JACS SOLUTIONS.
