

# JACS ABC'S For Saving Money

$$$$$ = A + B + C + D + E$$

## Beginning Cost

JACS offers competitive, one-time fee pricing on all hardware and is a one-stop shop delivering design and build customization without the challenge of managing multiple suppliers. Thus saving you time, money, and resources with an affordable total solution.

## Acquisition Cost

Consumer-grade devices are typically over- or under-featured. JACS designs to your specific feature and capability requirements so you don't overpay for what you don't need. As an ISO9001:2015 certified company, JACS applies best practices to our development and manufacturing processes to ensure your solution is built to last.

## Continuing Cost

JACS' warranty plans give you peace-of-mind, and cost savings long after your initial purchase. There are also no ongoing maintenance costs as a result of custom-built firmware which is not as vulnerable to security patches as the standard Android OS.

## Downtime Cost

JACS' remote firmware and application management services provide greater update oversight with you in the driver seat for everything from the exact time, date, and even location of updates so you can minimize the cost of downtime.

## End-of-Life Cost

JACS' devices have an end-of-life average that is 2 to 3 times longer than that of our consumer-grade competitors. This long end-of-life reduces the total upgrade cost and provides operational efficiency by freeing up capital for other mission-critical tasks.
