

# TT800V VERIZON 4G LTE ANDROID TABLET

The **JACS TT800V 8" Verizon 4G LTE Android Tablet** provides reliable connectivity from Verizon with an enterprise-grade semi-rugged design to withstand extreme temperatures and heavy use in harsh conditions that consumer-grade tablets can't handle. It stays powerful and productive with an automotive grade GPS performance, a large-capacity battery, a bright sunlight-readable screen and a standard 2.0 USB Port with On-The-Go (OTG) feature to support a multitude of adaptors. Configured for security, the TT800V's have a locked-down firmware and a tamper-proof application interface. With JACS Solutions unbeatable customization service, your preferred settings and application configurations are easily customized and loaded on each device for an effortless deployment.

## SEMI-RUGGED

Built to withstand temperature and vibration extremes to operate in the harshest of environments

## FLEXIBILITY

Optional accessories to enhance your experience including rubber cases, in vehicle accessories and more

## SECURITY

Protect sensitive data with encrypted online connections and tamper-proof interface

## CUSTOMIZING YOUR TT800V TABLET

### FIRMWARE CUSTOMIZATION

JACS firmware customization allows you to control pre-loaded applications at the operating system level, change default system settings, remove unwanted applications and "bloatware", lockdown the device for kiosk usage with a customer launcher and a host of other possibilities.

### OPTIONAL ACCESSORIES

Optional accessories available to enhance your experience including rubber cases, impact-resistant screen protectors, and in vehicle accessories (dock, mount, & power kit). You can leverage the power of international navigation with both a built-in GPS and GLONASS system.
