

# JACS SOLUTIONS FOR EDUCATION

TECHNOLOGY SOLUTIONS FOR IN-PERSON, VIRTUAL, OR HYBRID LEARNING

Educational systems and institutions need cost-effective, easy-to-deploy learning solutions that offer opportunities for all students and that address unforeseen changes in the way education is delivered. JACS Solutions understands the challenges of connecting students and faculty in a constantly evolving learning environment. We can help you implement cost-effective solutions that bridge the digital divide and prove learning can occur anywhere.

## CONNECT

Ensure students and educators have access to reliable wireless connectivity, no matter where they are.

## ENAGAGE

Keep students engaged using fully customized devices that reduce security risks and allow you to manage network traffic.

## INTEGRATE

Work seamlessly with your learning management systems to promote student engagement and collaboration.

## EMPOWERING STUDENTS, FACULTY AND PARENTS

### PARENT AND STUDENT ENGAGEMENT

Keep parents and students engaged with customizable, CIPA-compliant solutions for use with educational applications, collaborative lesson planning, studying, and more.

### TRANSPORTATION LOGISTICS AND STUDENT SAFETY

Give parents peace of mind and keep student transportation operators and administrators informed with integrated, connected solutions that include tracking, communication, and alerting capabilities.

# IoT SOLUTIONS FOR THE EDUCATION ECOSYSTEM

## EMPOWERING INSTRUCTORS

The global pandemic has had a profound impact on both K-12 and secondary education, forever changing the classroom experience as we know it. Educational systems and institutions need cost-effective, easy-to-deploy, virtual learning solutions that empower teachers to focus on the teaching experience rather than be encumbered by the underlying technology.

## ENHANCING STUDENT TRANSPORTATION

Management and administration of student transportation is uniquely complex, combining the need for rider safety with the logistical challenges of keeping buses on schedule and drivers and fleets operating at peak efficiency. JACS has designed modular transportation platforms that ensure rider safety, optimize routing, and increase operational efficiency.

## EXTENDING EDUCATIONAL OPPORTUNITIES

Though the growth in virtual learning was borne out of necessity, it demonstrated technology's ability to bridge the digital divide in education by proving that learning can occur virtually anywhere. JACS offers reliable wireless connectivity that allows students to remotely engage in online learning and access resources and lesson plans.
