

JACS SOLUTIONS FOR HEALTHCARE

OPTIMIZE PATIENT JOURNEYS WITH CUSTOM TECHNOLOGY SOLUTIONS

The evolving nature of healthcare demands end-to-end, connected health-tech solutions that facilitate access, advance innovation, and boost adherence to improve the care delivery experience for patients and providers. JACS Solutions provides purpose-built, cost-effective technology solutions to hospitals, clinical systems, home health agencies, and labs that deliver on the promise of a new paradigm of care.

SECURE

Protect against privacy threats by securing data transmission between patients and providers.

CONNECT

Ensure access to care for all patients regardless of age, familiarity with technology, or degree of mobility.

PROTECT

Custom-designed solutions with antimicrobial product finishes and Ultraviolet (UV) light sanitization.

TRANSFORM THE INTERACTION BETWEEN PATIENTS AND PROVIDERS

INTELLIGENT DATA INTEGRATION

JACS custom-built solutions integrate seamlessly into existing virtual care platforms allowing healthcare providers to manage telehealth appointments, remotely gather biometric measurements, and collect symptom and behavioral data for treatment and diagnosis.

ENHANCED PATIENT ENGAGEMENT

JACS improves patients' healthcare experience by providing secure and reliable access to treatment from wherever they may be, leading to higher levels of engagement and improved outcomes, reducing costs associated with delivering care.

END-TO-END CONNECTED HEALTHCARE SOLUTIONS

HIPAA-COMPLIANT CONNECTIVITY

The success of remote patient monitoring applications relies on the ability of patients and doctors to communicate easily while securely sharing vital data. JACS smart devices enable effective management and treatment of medical conditions by providing a reliable, HIPAA-compliant internet connection and optimized user interface that are core to any virtual care solution.

EXTENDED EQUIPMENT LIFECYCLES

As care relies more heavily on the connection of medical devices and equipment to the Internet of Things, extending the life of legacy infrastructure is critical to reducing costs and maintaining operational efficiency. Retrofit existing equipment with JACS connectivity solutions to leverage next-generation communication protocols and add intelligence necessary to enable health-care applications.

INTEGRATED TREATMENT SOLUTIONS

JACS platforms are custom-built from a toolkit of industry-standard communication protocols and technologies in order to integrate with third-party devices and software. Our manufacturer-agnostic approach facilitates the development of end-to-end health-tech solutions such as automated pill dispensing systems that ensure adherence to care and dosage accuracy in order to reduce risk and costs across the healthcare landscape.
