

# JACS SOLUTIONS FOR RETAIL & HOSPITALITY FROM PRODUCTION LINE TO POINT-OF-SALE

In the retail and hospitality industries, best-in-class customer experiences go much deeper than engagement at the point-of-sale. JACS Solutions helps deliver those end-to-end experiences by building connected, intelligent, and secure solutions that provide visibility at all points of the retail ecosystem; from manufacturing to distribution, to inventory management, to the in-person or online point-of-service. JACS enables your teams to react to demand in real-time to delight customers and build brand loyalty.

## ADAPTIVE

Consumer-facing solutions that are custom-designed to be simple to use & responsive to real-time needs.

## SECURE

Locked-down firmware and hardware options for secure transactions over cellular, Wi-Fi, or private LTE networks.

## CONNECTED

Customized technology that delivers critical data securely and in real-time to connect every stage of the supply chain.

## RESPOND TO CONSUMER DEMAND, ON DEMAND

### INTELLIGENT END-TO-END RETAIL

Build smart technology solutions that allow you to execute successful product distribution strategies based on sales. Gather insights at all points in the supply chain so teams can manage workflows and respond effectively to consumer needs in real-time.

### OPTIMIZED RETAIL ECOSYSTEMS

JACS builds connected systems that help customers get the products and services they need in the manner and location that they want to receive them with experiences that are consistent across mobile, web, and in-person channels.
